September 2009

Dear Parents:

As each school year begins, we address parents on the importance of paying attention on our streets in town and observing the rules of the road. However, after the first few weeks of school, we begin to receive the complaints of cars speeding, double-parking in front of the schools, turning in the middle of the roadway sometimes even in front of traffic and dropping off students in the street.

Our crossing guards have reported on several occasions cars getting very close to them while crossing children. Additionally, our officers never seem to run out of cars to stop as they speed past our schools and the police station.

I am sure many of you have seen actions from other drivers while in town that you have wished a police officer had been there to address the violation. Please drive with care and slow down as you approach the schools and children walking in the roads.

If you see something that you are concerned about as a safety matter, by all means call us so we can look into it. Observe all of the parking regulations in and around the schools, many which are time-limited.

In closing, I would like to thank many of you for your help during the past school year and ask for all of your support with the upcoming year.

Sincerely,

Joseph F. Clark, Jr.
Chief of Police
