

Gould School 5th Grade Summer Packet

Welcome to 5th grade mathematics! This summer review packet is a review of fundamental skills as you transition to 5th grade mathematics.

Please read it carefully and make sure you answer all the questions, <u>showing your work in a</u> <u>neat and</u> <u>organized</u> fashion.

The work contained in the math packet highlights concepts and other skills that you should be well versed in before entering 5th grade in September.

Below are just a few websites that you might find helpful.

https://www.ixl.com/math/

https://www.khanacademy.org/math/k-8-grades

All students will be required to submit their Summer Math Packet the first day of math class.

Also make sure you have your multiplication and division facts (0-12) mastered! They are a very important part of our curriculum.

See you in September! Have a safe and happy summer!

Ms. Dillenkofer ndillenkofer@ncboe.org

Incoming 5th Grade Summer Math Packet

Name	e Homeroom
l have	e checked the work completed:
	(Parent Signature)
1.	List all the factors of 24.
2.	List the first 5 multiples of 8.
3. a.	I am a factor of 36 and a multiple of 3. What number am I? Circle all correct answers.
b. C.	9 2
d.	12
4.	Find the difference of 136 and 67. Show all of your work!
5. a.	Which expression is equal to 3 x 49? 3 x (4 + 9)

- b. 3 + (40 x 9)
- c. 3 x (40 + 9)
- d. (3 x 4) + (3 x 9)
- 6. Find the product of 413 and 28. Show all of your work!

- 7. What is the estimated value of this expression? 539 \div 4
- a. 15
- b. 100
- c. 105
- d. 150
- 8. There are 168 lunches to be shared equally among 3 fourth-grade classes. How many lunches will go to each class?
- 9. If 600 ÷ A = 300, what is A?
- a. 200
- b. 30
- c. 20
- d. 2
- 10. Fill in the blank with the number that makes this math sentence correct:

12 x _____ = 72

- 11. What division number sentence could you use to check 3 x 6 =18?
- 12. The students in your class collected pop cans to raise money for a class trip. The goal for each student was to collect 150 can each. There are 27 students in your class. How many cans would that be altogether?

- 13. Suppose 33 photos are placed in a photo album. How many pages are needed if 4 photo fit on a page?
- a. 9 pages
- b. 10 pages
- c. 11 pages
- d. 12 pages
- 14. What fraction is equal to 0.45?
- 15. Name a decimal equivalent to $\frac{1}{4}$?
- 16. Three and seven hundredths is between what two whole numbers?
- 17. Write 7/10 as a decimal.
- 18. Name a fraction equivalent to 0.5.
- 19. Circle all the pictures that represent $\frac{1}{3}$.

20. What is the fraction for the shaded part of this set?

- 23. Write $\frac{11}{2}$ as a mixed number.
- 24. The distance from home to school is ⁷/₈ of a mile for Amy and 4/8 of a mile from Tom. How much further does Amy walk than Tom?
- 25. Sonya needs ½ teaspoon of salt for her recipe to make rolls. She needs ¼ teaspoon of salt for her recipe to make biscuits. How much salt will she need to make both recipes?

26. Solve for the unknown in this equation: $\frac{2}{4}$ + n = $\frac{3}{4}$ n = _____

- 27. Which of the following is closest to the actual product of 81 and 82?
- a. 6,400
- b. 7,200
- c. 720
- d. 1,100

- 28. Which is most likely the length of a telephone book?
- a. 30 kilometers
- b. 30 centimeters
- c. 30 millimeters
- d. 30 meters
- 29. Sheryl planned to buy a wallpaper border for her bedroom. She measured the lengths of the walls and found the perimeter of her room. Use the picture below to determine the perimeter.

	10 feet
--	---------

12 feet

30. Sheryl also wants to buy new carpeting for her room. She needs the square footage of the room to take to the store to price how much carpeting would be. What is the area of her room in the picture above?

31. What is the width of a rectangle that has a length of 6 feet and an area of 60 square feet? You may want to draw a picture to help you.

32. Sarah looks at the clock in her kitchen. She realizes the minute and hour hand form an angle. If the clock below is the one in Sarah's kitchen, what type of angle does Sarah see?

- a. Acute
- b. Right
- c. Obtuse
- 33. What type of angle is shown below?

34. Circle the right angle.

35. In the drawing below, which line is parallel to line A? Line _____

36. Which type of triangle have only 2 equal sides, like the drawing below?

- a. Equilateral
- b. Isosceles
- c. Pyramid
- d. Right

37. Circle the shape with only ONE line of symmetry.

38. Which benchmark is 1/8 closest to? Circle your answer.

0 ½ 1

39. Which benchmark is 5/8 closest to? Circle your answer.

0 ½ 1

40. Find the quotient of 875 and 5. Show all of your work.

41. Find the product of 46 and 78. Show all of your work.

- 42. Which shows the fractions in order from least to greatest?
- a. $\frac{1}{4}$ $\frac{1}{3}$ $\frac{1}{2}$ b. $\frac{1}{2}$ $\frac{1}{3}$ $\frac{1}{4}$
- C. $\frac{1}{3}$ $\frac{1}{4}$ $\frac{1}{2}$
- 43. Sharon had a bag of 12 marbles. She Gave 8 of the marbles to Don. Which fractional part of the marbles did Sharon have left?
- 44. Show how these two fractions are equal by shading some of each rectangle.

45. Locate and label these two fractions on the number line. Then tell which one is larger.

47. Identify the shaded portion of this picture as a mixed number and an improper fraction.

48. Solve the following problems:

a.
$$\frac{3}{4} + \frac{2}{4} =$$

b.
$$\frac{3}{8} - \frac{1}{8} =$$

49. Simon had one whole pizza. His dad ate $\frac{3}{8}$ and his mom ate $\frac{2}{8}$. Simon planned on eating what was left. How much of the pizza will Simon eat?
